NSTF e-Newsletter

S.E.T. for socio-economic growth

Why India and Brazil?

Message from the NSTF Executive Director, Ms Jansie Niehaus

Both the actions (or non-actions) of politicians and the new variants of the novel coronavirus are responsible for the Brazilian and Indian tragedies. There are important lessons to be learnt from these countries' devastating experiences with COVID-19, also here in South Africa. [Read](#) the ED's message.

NSTF News

Twenty years of recognising youth excellence in physical science and mathematics

The NSTF invites the [Brilliants](#) students – the top performers in mathematics and physical science from around the country – to the NSTF-South32 [Awards Gala evening](#) each year. They are accommodated in a hotel and attend the event to expose them to people from the professional research and innovation environment. The speeches some of the students deliver have become a highlight of the event.

Motivational talks: From the inception of the Brilliants Programme in 2008 (that evolved from the Education Recognition Programme, started in 2001) on the day after the Awards dinner, the NSTF invites selected speakers from the science, engineering, technology (SET) and innovation community to inform these brilliant youngsters of the various career opportunities and the importance of personal and professional development. In the past, speakers addressed topics such as career paths and preparing for the workplace; how to develop your personal life through acquiring life skills (self-development, assertiveness, time and financial management, planning for the future, etc.); opportunities for science graduates; and challenges faced by young graduates and how to overcome these.

Tours to industry related facilities: The Brilliants programme was expanded to include tours to SET-related sites and national research facilities. In 2013, the Brilliants students

were treated to an excursion on the Gautrain to the visiting Body Worlds Exhibition at [Sci-Bono Discovery Centre](#), Newtown, Johannesburg.

In 2014 they visited [Maropeng](#) (the Cradle of Humankind) and the Sterkfontein Caves for an informative tour of the caves, which are important fossil sites and the visitor centre, which had displays on the hominids discovered in the area, as well as interactive displays on science, geology, etc. The tour received excellent ratings and inspired and motivated the students to continue on their individual paths of success.

The 2015 Brilliants tour began on the day prior to the NSTF Awards, with a tour to explore the [Council for Scientific and Industrial Research](#) (CSIR) National Laser Centre (NLC), [Aerosud](#) and the [South African Air Force Museum](#) at Swartkops Air Force Base. The students rated the tour as a 'very interesting' or 'fantastic' experience and enjoyed the exposure to cutting-edge technology, innovation, engineering and scientific research at the NLC and Aerosud. The South African Air Force Museum, one of the largest military aviation museums, offered students insight into the history of aviation and developments from the days of the Paterson Aviation School at Kimberley to modern-day jets.

In 2016, the students' visit to Gauteng commenced with a tour to the new facilities of [AGT Foods Africa](#) - Advance Seed in Krugersdorp, in line with that year's International Year of Pulses theme. AGT Foods Africa are suppliers of whole food products and of agricultural production, processing and trading services to much of the African continent. The second leg of the tour comprised a visit to the new [Bio-manufacturing Industry Development Centre](#) (BIDC), housed at the CSIR. The tour demonstrated how scientists translate biotechnology-based research and development into market-ready products and services.

In 2017, the NSTF collaborated with the [Square Kilometre Array \(SKA\) South Africa](#) to reward the selected Brilliants students with a national astro-tour. The tour involved visits to various astronomy sites, including the MeerKAT (SKA) site outside Carnarvon, [South African Large Telescope](#) (SALT) outside Sutherland, [Iziko Museum and Planetarium](#) and [South African Astronomical Observatory](#) (SAAO) in Cape Town. Brilliants students also did stargazing in the Karoo to learn about stars and planets, participated in an introduction to big data workshop by Google, and visited various scientific tourism sites in Cape Town. The theme of the first astronomy tour focused on the 2017 International Year of Sustainable Tourism for Development.

The astronomy tour was repeated for the selected Brilliants students in 2018, with the addition of a visit to [Hartebeesthoek Radio Astronomy Observatory](#) (HartRAO). The astro-tour also took place in 2019, with the exception of a visit to the MeerKAT site in Carnarvon (access to the SKA facilities was no longer possible because the site became fully operational in the collection of data, and scientific observations, amongst other issues). This tour was the most extensive, covering four provinces that included visits to the [Boyden Observatory](#) and [Naval Hill Planetarium](#) in Bloemfontein.

Videos and photos of the astro-tours (produced by SAAO/SARAO) was screened at the NSTF-South32 Awards Gala Dinner. View the [gallery](#) on the NSTF website of past experiences of the Brilliants students.

The Brilliants tour was not possible in 2020 because of the COVID-19 pandemic.

Gala Events to celebrate the NSTF-South32 Awardees

The [gala event](#) of the 2020/2021 [NSTF-South32 Awards](#) will be a hybrid event, broadcast live simultaneously from venues in Johannesburg and Cape Town. It will take place on 29 July 2021. Details will follow soon. The 23rd annual group of [finalists](#) will be honoured and the winners announced at this prestigious occasion.

The NSTF's theme for 2021 is **Creative Economy for Sustainable Development**, aligned with the United Nations' [International Year of Creative Economy for Sustainable Development](#). This will also be the theme of the Awards gala events.

Save these dates for upcoming Discussion Forums

The [Discussion Forum](#) on **Plant Health – threats to biosecurity, biodiversity and food security** will take place on 10-11 June. The invitation has been circulated. This online interactive forum is free. Please ensure that you are [registered](#) for the event.

The Discussion Forum under the auspices of [proSET](#) will be on **4IR Technologies and Connectivity**. It is scheduled for 9-10 September.

The Discussion Forum on the international theme **Creative Economy for Sustainable Development** is planned for 14-15 October. The NSTF aims to highlight initiatives that bridge the gap between creativity and science/technology, and to discuss significant societal issues relating to these.

Please send ideas of topics and speakers for these Discussion Forums to [Ms Gabriela Mankune](#).

Discussion Forum on epidemics elicits wide media interest

The media release on the NSTF Discussion Forum that took place on 26 February, titled [Preparing for Epidemics in South Africa – human and animal](#), created wide interest. The NSTF Executive Director, Ms Jansie Niehaus, took part in two radio interviews on the topic of infectious disease that can, or have caused epidemics in South Africa. [Read](#) the media release.

NSTF-proSET STEMulator 2021 competition – prizes to be won!

Prizes will be awarded to five individuals who find/contribute new quality content to feature on the [STEMulator.org](#). Participants must be members/employees of NSTF member organisations. The prizes are worth R12 000 (twelve thousand rand) each. If the contributed content is the IP of an institution/organisation, entrants need to include a letter of authorisation from the institution/organisation stating that the material may be shared on the STEMulator website, and how the originator should be acknowledged. The organisation will be fully acknowledged in publicity and on the STEMulator.

Entry forms are available from member organisations' NSTF Member Representatives. Send in your animated material together with the entry form to the NSTF for the attention

Finalists in the 2020/2021 NSTF-South32 Awards announced

The [finalists](#) in the prestigious 2020/2021 [NSTF-South32 Awards](#) for outstanding contributions in science, engineering, technology (SET) and innovation in South Africa were announced recently. Congratulations to the individuals, teams and organisations who received this exceptional honour.

The winners will be announced at the 2021 NSTF-South32 Gala Awards event on 29 July.

If you have any questions, please email awards@nstf.org.za.

Today's research ... tomorrow's innovation

of Ms [Gabriela Mankune](#). Closing Date for entries is **20 July 2021**. Look out for our communication about the winning contributions in this e-newsletter by the end of **September 2021**.

STEMulator.org is the flagship project of [proSET](#) (Professionals in Science, Engineering and Technology), one of seven [membership sectors](#) of the NSTF. [proSET](#) represents about 40 professional bodies and learned societies in South Africa. Read more about STEMulator.org in the March issue of [Civil Engineering](#), the SAICE (South African Institution of Civil Engineering) magazine, pages 70-71.

Share 'n Dare programme inspires young people

The NSTF's [Share 'n Dare programme](#) is a platform for award-winning researchers, engineers and innovators to act as role models and ambassadors for science, engineering, technology (SET) and innovation. The programme provides opportunities to share knowledge with youth and communities, inspiring young people to pursue studies and careers in these fields.

At the Share 'n Dare events, the presenters typically share their personal life stories of what sparked their interest, how they planned their journey to study and their career. Examples of these activities can be seen in NSTF [audio and video clips](#).

Bursaries available

Find the latest news on bursaries in science, engineering and technology (SET) in the NSTF [Bursary Directory](#). Currently available are:

- [Sappi bursary opportunities](#) (Deadline: 30 September 2021)
- [FMCSA FORD Bursary](#) (Open)

Visit the NSTF [bursary website](#) for information on [SET careers](#) and inspiring people who work in these areas.

[proSET](#) (Professionals in science, engineering and technology) is a sector of the NSTF representing about 40 professional and learned societies. This section shares news about [members](#) and introduces new members of the [proSET sector](#).

- **Competition on ideas, designs and applications for 5G and beyond for Africa**

The [IEEE South Africa Section](#), [South African Institute of Electrical Engineers](#) (SAIEE), NSTF/proSET and the [University of Pretoria](#) invite undergraduate and postgraduate students in electrical engineering and related disciplines to submit essays on the topic "5G and Beyond for South Africa and Africa". The submission must show how 5G is relevant to and can be used in South Africa, our continent, and serve its people's needs considering the availability of skills and other relevant factors. The submission deadline is 15 June 2021. [Read more](#).

- **The Water Institute of Southern African**

At the height of lockdown in 2020, the [Water Institute of Southern Africa](#) (WISA) did something unusual, but on reflection was in keeping with the mandate of an NPO whose

2500 members' primary concern is the safe and efficient use of water. They realised that PPE companies were just not geared up to provide their products in the volumes needed, but the 3D printing hobbyist groups could print PPE. But they were not an NPO and were not equipped to manage fund donations. The Board agreed that WISA could use its platforms and connections to call for donations for filament so that PPE equipment could be printed, and to transparently manage any funds that were donated.

The hobbyists were not in a position to manage the donations, so WISA stepped in and provided its administrative support so that the funds could be disbursed. The result was a reusable 3D printed mask with space for a filter that could be made from a small piece of an N95 mask. The project was a success with thousands of masks made and distributed.

When the need for the 3D printed masks had run its course, WISA decided to support the AfriSpacer – a simple, low-cost attachment for a plastic bottle which can be used with a traditional asthma inhaler to increase its effectiveness. [Read more.](#)

SET-related policies currently open for public comment

Policies open for comment allow the science, engineering and technology (SET) community to keep track of the changing regulation environment.

- [Astronomy Geographic Advantage Act: Revised exempted radio frequency spectrum for the Karoo Central Astronomy Advantage Area](#) (Comment by 6 June 2021)
- [Marketing of Agricultural Products Act: Wine Industry Application for the Continuation of Statutory Levies](#) (Comment by 11 June 2021)
- [Draft National Data And Cloud Policy](#) (Comment by 11 June 2021)
- [Auto Green Paper on the advancement of new energy vehicles in South Africa](#) (Comment by 15 June 2021)
- [Architectural Profession Act: Requirements for recognition and maintenance of recognition for voluntary association: Amendments](#) (Comment by 7 July 2021)
- [Mineral and Petroleum Resources Development Act: National Mine Closure Strategy](#) (Comment by 23 July 2021)
- [Occupational Health and Safety Amendment Bill: Amendments](#) (Comment by 31 July 2021)
- [National Environmental Management: Waste Act: National Norms and Standards for the Treatment of Organic Waste](#) (Extension of deadline for comments to 31 July 2021)
- [Medicines and Related Substances Act: Regulations: Medical Devices](#) (Comment by 25 August 2021)

About the NSTF

The [National Science and Technology Forum](#) (NSTF), established in 1995, is a broadly-representative stakeholder body for all science, engineering and technology (SET) and innovation organisations in South Africa, which seeks to influence policy formulation and delivery.

The [NSTF Awards](#) are unique in SA, recognising the outstanding contributions of individuals and groups to SET and innovation.

The [science bursaries](#) page provides information on bursaries and bursary providers for science, engineering and related studies.

[STEMulator.org](#) attracts learners and students to the exciting world of science, technology, engineering and mathematics (STEM). It provides a virtual world full of stimulating content to excite and inform the youth, including STEM career guidance. Established under the auspices of the [NSTF proSET membership sector](#) (Professionals in *science, engineering and technology*).
